VITALII KHAICHENKO

Senior Flutter & Mobile Engineer (12+ Yrs Exp)

Almaty / Astana, Kazakhstan (UTC+5) | Available for Remote / B2B Contract (Deel, Invoice)

- **Email:** hayvetalkz@gmail.com
- **Phone/Telegram:** +7 (708) 023-72-79
- **LinkedIn:** linkedin.com/in/vitalii-khaichenko-0b23763b6/
- **GitHub:** github.com/Vitald3
- **Web Portfolio:** app-creator.site

PROFESSIONAL SUMMARY

Senior Software Engineer with **12+ years of total software engineering experience**, including **6 years specializing in Flutter cross-platform mobile development** and **8 years designing & architecting scalable REST APIs**. Proven track record of delivering high-performance iOS & Android applications from concept to production, managing complex state architecture (BLoC, Provider), and integrating payment gateways (Flutterwave, Stripe) and real-time features (WebSockets). Expert in cross-platform lifecycle management, background processing, and B2B remote contract delivery.

TECHNICAL EXPERTISE

- **Mobile Engineering:** Flutter, Dart, iOS (Swift / TestFlight), Android (Kotlin / Google Play Console), Cross-Platform Architecture
- **State & Architecture:** BLoC / Cubit, Provider, Riverpod, Clean Architecture, SOLID Principles, App Lifecycle Management
- **Backend & APIs (8+ Yrs):** RESTful APIs, Laravel, PHP, Node.js, WebSockets, Firebase, MySQL, PostgreSQL, Redis
- **Integrations & DevOps:** Flutterwave, Stripe, In-App Purchases, Deep Linking, OAuth 2.0, CI/CD (GitHub Actions, Codemagic), Git

WORK EXPERIENCE

Senior Flutter / Mobile Engineer | *Independent Software Contractor / B2B Remote Projects*

(2021 – PRESENT)

- Architected and published multiple commercial cross-platform mobile applications for iOS and Android using Flutter & Dart.
- Implemented robust state management using BLoC pattern and Clean Architecture, reducing app crash rates to under 0.1%.

- Integrated secure payment gateways (including Flutterwave checkout & webhooks), real-time chats via WebSockets, and social auth.
- Handled mobile app lifecycle events and background synchronization across iOS and Android OS battery-optimization constraints.
- Streamlined App Store and Google Play distribution pipelines using TestFlight and Firebase App Distribution.

Senior Mobile & API Developer | *IT Solutions & Product Studio*

(2018 – 2021)

- Led the frontend mobile development transition to Flutter, cutting cross-platform delivery time by 40%.
- Designed high-throughput RESTful APIs with Laravel and MySQL, serving 50k+ daily active mobile app users.
- Built real-time polling and WebSocket background services with seamless reconnection handling for unstable mobile connections.
- Collaborated with product teams and UI/UX designers to deliver pixel-perfect responsive layouts on iOS and Android.

Software Engineer / Backend Developer | *Enterprise Web Applications*

(2014 – 2018)

- Engineered backend microservices, database schemas, and external API integrations for scalable web applications.
- Optimized SQL queries, caching layers (Redis), and background queue workers (Laravel Queues / Redis) to improve response times by 50%.

EDUCATION & CONTRACTING INFO

- **Education:** Bachelor's Degree in Computer Science / Software Engineering
- **Contracting Status:** Registered Business Entity (Kazakhstan Individual Entrepreneur / IP). Fully compliant with direct SWIFT USD/EUR transfers and platforms like Deel / Solar Staff.
